Technical information

Application:

Oventrop compact distributor for the connection of the "Regumat" DN 25 stations ("Regumat" DN 32 with connection fittings).

Consisting of distributor, thermal insulation and wall bracket including fixing material.

The distributor is, for instance, used for volume flow distribution from the heat generator to several heating circuits.

Advantages:

- space-saving installation
- simple installation
- problem-free water distribution even for small performance ranges

Models:	Item no.:
for 2 heating circuits	1351582
for 3 heating circuits	1351583
for 4 heating circuits	1351584
for 5 heating circuits	1351585
for 6 heating circuits	1351586
for 7 heating circuits	1351587
for 8 heating circuits	1351588

Materials:

Distributor: Steel, primed black
Thermal insulation: Expanded polypropylene
Wall bracket: Steel galvanised

Connections:

To heating circuit: G $1\frac{1}{2}$ collar nut, flat sealing T boiler: G $1\frac{1}{2}$ male thread, flat sealing

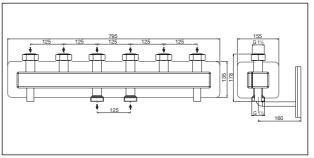

The direction of flow must be observed!

Technical data:

 $\begin{tabular}{ll} Max. operating pressure p_s: & 4 bar \\ Max. operating temperature t_s: & 110 °C \\ Max. flow rate: & 4 m³/h \end{tabular}$

Recommended application

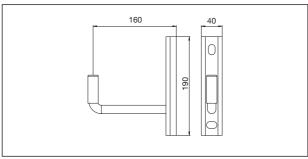

range: max. 95 kW ($\Delta T = 20 \text{ K}$)

Dimensions distributor DN 25, 3-fold

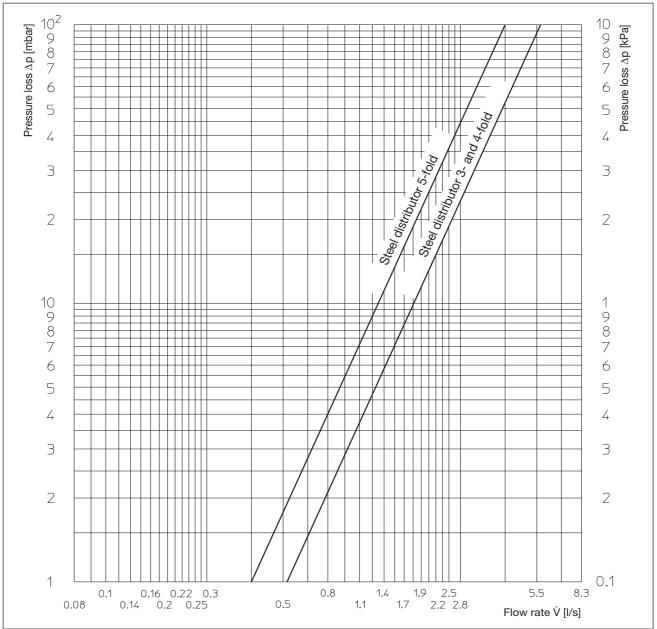

Dimensions distributor DN 25, 4-fold
